Dear colleagues and stakeholders, we are pleased to present to you the Joanna Briggs Institute’s Annual Report for 2014. All businesses experience times of growth, change and challenge. The Joanna Briggs Institute has experienced much change in the last 12 months, but we have a clear vision and mission and these are long term and enduring. While we have evolved over the course of our existence, and will continue to in the years ahead, we have not lost sight of these two fundamental things. Ultimately, 2014 provided us with an opportunity to reflect on what we have achieved, and focus on where we might go, as an organisation. Fresh perspectives afforded us a unique chance to examine our business and we are pleased to say that there were some very important insights that came out of that process.

A sustainable business is one that plans effectively, uses resources wisely and maximises the positive impact of its actions on its operations and on the communities for which it serves. Many companies make the mistake of assuming that if they get one of these things right the rest will follow. The Joanna Briggs Institute has never taken this approach. It is made up of a group of people with discipline and resolve who look beyond traditional ways of operating with a willingness to explore new practices that may offer a more positive impact and greater longevity.

2014 was a year in which we critically examined our current business practices and required resources. It is a process that will continue more formally as we enter 2015, but one that has been absolutely necessary in order to be authentically sustainable and it is timely for this kind of analysis to occur.

The Joanna Briggs Institute is essentially a borderless enterprise as it connects with researchers and health professionals across international borders on a daily basis.
While no new products were launched this year, we have taken important steps towards analysing our business model, galvanising our collaborations and partnerships and moving to a more solid position from which to extend the principles that underpin our business value.

Of course work does not stop and there is always more to be done. We know that we have the right people in place and we know that we create high quality content for our end users. Our opportunity now is to take these two things and invest in the future of them in order to add value for our key stakeholders from around the world. In partnership with Wolters Kluwer Health we believe that we can build on our core strengths and create new market opportunities that will extend our business model and generate revenue.

Against a backdrop of broader organisational change across the Faculty of Health Science and the University of Adelaide more generally, the Institute continues to be guided by its original vision and mission. We remain committed to improving global health outcomes through evidence-informed decision-making at the point-of-care and this, above all else, will continue to be the driver of our business irrespective of the structural and administrative changes occurring around us. We are committed to making a positive contribution to the communities that we serve, both in Australia and overseas.

Of course it was a year of many achievements, and partnerships have been key to that success. We had a very good year commercially and we continue to invest in our partnership with Wolters Kluwer Health and to work collaboratively with them to solidify our position as a global leader in the delivery of evidence-based information and resources.

Equally, our partnership with the Joanna Briggs Collaboration (JBC) is stronger than ever and 2014 saw them galvanised as a force to be reckoned with! We are proud of the strength of these global relationships and the opportunities afforded to us through such partnerships. Indeed, it is a privilege to work with such a distinguished array of brilliant academics on the world stage to translate evidence into improved outcomes for the global community.

The strength of the JBC was further demonstrated by an incredibly successful international annual conference and meeting organised by our collaborating centres in Singapore. The JBI Colloquium, jointly hosted by the Singapore National University Hospital Centre for Evidence Based Nursing, the National Healthcare Group HSOR Collaborating Centre for Evidence Based Health Services Management and the Centre for Evidence Based Practices in Mental Health Care, was an impressive and professionally run event which we were all honoured to attend and participate in.

Strategy and investment in business analysis is core to our ability to grow and improve our products and services. As such, we established two new groups this year to assess the quality and impact of JBI resources. The members of both groups come from JBI collaborating entities as well as staff of the Institute in Adelaide and they both produced some important initial work in these areas during 2014. The first impact report was released at the end of the year and has received much interest both locally and overseas. This work is vital to our future development and will provide important data to inform how we move forward in several areas.

Software solutions can have a dramatic influence on business success and this is no different for JBI. We made positive inroads this year with IT redevelopment with the formation of a new team. This team will be responsible for the redevelopment of our premier software suite, SUMARI, in the months ahead as well as PACES next year and new developments in the future. We are excited to have this new team and a new approach to IT in the Institute and we believe that both will serve us well in ensuring we have world class IT infrastructure and resources.

Education remains fundamentally important to our business and although we had to cancel our short course program in Adelaide, Comprehensive Systematic Review Training was still conducted by our centres internationally and continues to be a most successful program, which we are now looking to redevelop in line with the new SUMARI and also to put online. Equally, our higher degree program continues to be an overwhelming success with the quality of our student body growing every year.

As we head toward our 20th year we would like to thank the Executive team and staff of the Institute in Adelaide, our collaborating centres and Advisory Committee and the Executive Dean of the Faculty of Health Sciences at the University of Adelaide for their support and their determination to see JBI succeed on the international stage again this year. You, along with our commercial partners Wolters Kluwer Health and our subscribers in health and educational facilities across the world, are the enduring and ultimately triumphant fabric of what makes our organisation such a success. Through positive times and through challenges this globally dispersed team of individuals demonstrates an unwavering strength, commitment and determination to achieve its goals and for that we are truly grateful. Now is the time to nurture a culture of discipline, patience and courage to look beyond the short term and opt for a business model that will assure JBI of maximum impact and longevity, and we look forward to working towards this with all of you.
Our team

Office of the Head of School/Executive Director

Head of School/Executive Director
Assoc Prof Zoe Jordan, BA, MA (Communication Studies), PhD (from January 2014 to March 2014)
Prof Lyle Palmer, BSc (Hons), PhD (from March to December 2014)

Executive Assistant
Joan O’Loghlin

Information and Technology Team

Dr Jeremy Swift, BSc, PhD (ICT)
Carl McGee, DipEng, DiplMM
You Hu, BCompApp, MSWEng
Gilli Atkinson, BE Mech (Hons), GDip Comp Sc
Niralan Bobalan

Institute/School Office

Institute (School) Manager
Julie Sulda, DipBusMgt, DipHRMgt

Finance Officer
Charmaine Galagala

Human Resources/Membership Officer
Frances Cricelli, MMktg

Administration Officer
Mai Vu, BBus, MAcctgFin

Synthesis Science

Director/Research Coordinator
Assoc Prof Ed Aromataris, BSc (Hons), PhD (to August 2014)
Acting, Dr Zachary Munn, BMR (NM), PhD (from September 2014 to December 2014)

Research Fellows
Dr Micah Peters, BHSc, MAQ, PhD
Dr Kristy Giles, BHHSc (Hons)
Dr Karolina Lisy, BSc (Hons), PhD

Research Assistants
Dagmara Ritano, BA, BHSc (Hons), GDPysch
Wing Hong Chu (Vincent), BSc (Biomedical Science), BHSc (Hons)

Administration Officers
Pam Fletcher
Sarah Silver

Implementation Science

Director/Postgraduate Coordinator
Assoc Prof Craig Lockwood, RN, BN, GDipClinNurs, MNSc, PhD

Research Fellows
Dr Zachary Munn, BMR (NM), PhD
Dr Yifan Xue, MBBS, MPH
Dr Kylie Porritt, RN, MNSc, PhD
Dr David Tivey, BSc (Hons), Ph.D
Dr Jared Campbell, BHSc (Hons), Ph.D
Dr Catalin Tufanaru, MD, MPH
Dr Matthew Stephenson, BBiotech (Hons), PhD
Dr Kyawt Kyawt Swe, Dip Med Ed, BSc, BNSc, MNSc, PhD
Dr Sarahlouise White, BSc (Hons), MClirSci, PhD
Sandeeep Moola, BDS, MHSMM (Hons), MPhil
Dr Judith Streak Gorernsall, BA (Hons) (Hons), MCom, PhD (to April 2014)
Alexa McArthur, RN, RM, CN, MPHIC
Dr Kandiah Umapathysivam, BSc (Hons), MSc, GradDipBus, PhD

Communication Science

Director/Deputy Head of School/ Learning and Teaching Coordinator
Assoc Prof Zoe Jordan, BA, MA (Communication Studies), PhD

Communications Officers
Jasmine Wan, BA (Hons)
Martin Williams, DipGD
Siang Tay, BA (Hons)
Zifang Su, BA (Hons), MPysch

Research Fellows
Dr Cindy Stern, BHSc (Hons), PhD
Dr Karolina Lisy, BSc (Hons), PhD
Bianca Pilla, BIntSt (Hons), MDevSt
Dr Kristy Giles, BHHSc (Hons), PhD

Trials Search Coordinator
Dr Leslye Long, AM, BAApplSci (Nsg), MHA, PhD

Administration Assistant
Adriana Turner, BMgt (Mktg)
Judith Palmer

Administrative Officers
Alex Mignone, BSocSc, DipLaw
Glenys Lillywhite

Staff from JBI’s Adelaide office enjoy a weekend summer picnic at one of the local parks.
The Honourable Sir Peter Cosgrove, as the new Patron of the Joanna Briggs Foundation, took time out to chat with staff during a visit to the JBI headquarters in June 2014.
The impact of our strategies to build and sustain capacity for HDR supervision have had a positive impact on the Faculty.
Governance

The School of Translational Health Science has a robust and inclusive committee structure that enables all staff to have a voice. These committees are accountable for the implementation of the strategic and operational plans incorporated within the School’s management and governance framework and reinforced through the performance development framework.

School Board
Chair: Assoc Prof Zoe Jordan
Secretary: Mrs Julie Sulda
Minute Secretary: Ms Joan O’Loghlin
Members: All JBI staff and titleholders and two elected student representatives
Meetings: Every six weeks
Reporting to: EDAC

Subcommittees
Executive Committee
(held jointly with the Committee of Management, JBI)
Chair: Assoc Prof Zoe Jordan
Secretary: Mrs Julie Sulda
Minute Secretary: Ms Joan O’Loghlin
Members: Executive Director, Directors and School Manager
Meetings: Every week
Reporting to: School Board > EDAC

Higher Degrees Committee
Chair: Assoc Prof Craig Lockwood
Secretary: Mrs Julie Sulda
Minute Secretary: Mr Alex Mignone
Members: Academic staff, clinical titleholders and affiliate titleholders of the Institute who are members of the School Board and who are actively supervising one or more HDR candidates
Meetings: Every quarter
Reporting to: School Board and Faculty Course and Program Approval Committee

Research Committee
Chair: Assoc Prof Edoardo Aromataris
Secretary: Mrs Julie Sulda
Minute Secretary: Mrs Pamela Fletcher
Members: Executive Director, Directors, School Manager, one member elected by each of the Synthesis Science Unit, Translation Science Unit, Communication Science Unit and Implementation Science Unit and the Research Officer, Synthesis Science
Meetings: Every 8 weeks
Reporting to: STHS School Board and Faculty Research Committee

Learning and Teaching Committee
Chair: Assoc Prof Zoe Jordan
Secretary: Mrs Julie Sulda
Minute Secretary: Ms Jasmine Wan
Members: The Executive Director, Directors, School Manager and all Research Fellows involved in teaching short courses
Meetings: Every quarter
Reporting to: School Board and Faculty Learning and Teaching Committee
The impact of our strategies to build and sustain capacity for HDR supervision have had a positive impact on the Faculty, and in terms of student load and student completions, the HDR program compares very well against schools with much larger numbers of academic staff. Table 3 highlights the loadings of the schools within the Faculty. As can be seen in Table 3, although a small school, our head count and EFTSL is the third highest in the Faculty; we therefore have a very significant impact on total Faculty HDR performance.
Research Schools

The School of Translational Health Science (STHS) Research Schools are compulsory events held each semester for all academic staff and current students. The focus and objective of these events is to work at building a cohort of health professionals who obtain their degree within a multidisciplinary context and achieve a depth of learning and experience that is more comprehensive than a singular focus on their own topic area and methods. During these occasions, there is opportunity for staff and existing students to review the progress of our new students and provide them with beneficial feedback. Throughout the intensive sessions, the new students’ posters are on display to allow fellow academics to peruse their work and provide comment. Research School is also an opportunity for completing students to present their results and demonstrate to commencing students the sequence for completing candidature.

The STHS considers a student’s ability to communicate their work verbally as a critical element in the transfer of knowledge and best practice, so expects its students to present on several occasions throughout candidature. Research School provides an ideal forum for students to fulfil this expectation and receive beneficial feedback. The STHS has for several years now prepared a compact agenda for its Research Schools, with a strong focus on student participation, interactive workshops and highly regarded academic/professional guest speakers. It is an opportunity to cultivate a spirit of academic collegiality amongst its students, with a view to building an alumni of graduates that remain affiliated with the School.

Table 3: Breakdown of Faculty load (Dec 2014)
8th Annual Florey Postgraduate Research Conference

When: 25 September 2014
Where: National Wine Centre, Adelaide

The Florey Postgraduate Research Conference is attended by postgraduate students, honours students, industry partners, researchers and academics from across the University of Adelaide.

Higher Degree Students of the STHS were invited to submit a poster abstract for the 8th Annual Florey Postgraduate Research Conference. By presenting a poster, HDR students had the opportunity to receive feedback and discuss their work with other students and researchers from across the entire Faculty.

The morning program comprised poster sessions where approximately 100 research postgraduates presented their research to be judged for sponsored prizes. The afternoon session featured Channel 7 and Mix 102.3 personality Mark Soderstrom as Master of Ceremonies, and our own Dr Zachary Munn, JBI Acting Director Synthesis Science and Higher Degrees Student Supervisor, and other esteemed academics and professionals for a very exciting ‘on the couch’ style panel discussion covering various perspectives on the area of burn injury, burns survivors and psychology. The session concluded with an awards ceremony.

Graduate Research Seminar Series

Friday, 28 March 2014

Speakers: Dr John Walsh and Dr Nayia Cominos, Discipline of Linguistics, University of Adelaide

Topic: A multidisciplinary approach to clinical handover in mental health: what might linguistics contribute?

This presentation discussed a current national scheme funded by an ARC linkage grant ‘The ECCHo Project’, a research study into effective communication in clinical handover. The ECCHo project was a three-year national research study that started in 2011. The project’s full title is ‘Effective clinical handover communication: improving patient safety, experiences and outcomes’. It involves a multidisciplinary group of researchers from universities and health departments in six states. The research team worked with clinicians in hospitals in NSW, ACT, WA and SA to observe, describe and analyse how clinicians in different hospital settings undertake clinical handover. The focus in SA is clinical handover in mental health, and the group worked with three mental health teams in one of the large metropolitan general hospitals.

Friday, 2 May 2014

Speaker: Professor Justin Beilby, Executive Dean of the Faculty of Health Science, University of Adelaide

Topic: Implementing new models of musculoskeletal services in rural South Australia – successes, pitfalls and failures.

Friday, 30 May 2014

Speaker: Professor Ben Mol, Lecturer of Obstetrics and Gynaecology at the University of Adelaide

Topic: Evaluation of effectiveness of health care: non-committal or binding?

Traditionally, medical practice has been based on a scientific paradigm that relied on understanding pathophysiological mechanisms. Following the definition of the concepts of clinical epidemiology in the 80s by Sackett, Guyatt and others, many of the previously accepted conventions and
concepts on which we practice medicine needed to be re-evaluated in pragmatic evaluations, focusing on outcomes relevant for patients. Despite advances in evidence-based medicine, there are several pressing problems, and these were illustrated and discussed by Professor Ben Mol thorough a case study presentation from the field of obstetrics. The issues included lack of long-term follow-up; lack of studies of effectiveness of interventions before they are introduced and translation of effective evidence into practice.

**Friday, 26 September 2014**

**Speaker:** Dr Jon Opie, Senior Lecturer, School of Humanities, University of Adelaide  
**Topic:** Objectivity Lost?

Dr Opie’s primary research interests are in the philosophy of mind, cognitive science and the philosophy of science.

It is often claimed that the objectivity of science is secured by observation. Theories are derived from the facts. Relativists reject this claim on the grounds that observation is unreliable and too flexible to provide a solid foundation for science. In his presentation, Dr Opie examined the arguments offered by relativists and showed that they fail, not least because of the typically naïve way relativists construe scientific observation. Engaging with relativism is useful, however, because the debate helps clarify the real basis of scientific objectivity.

**Friday, 31 October 2014**

**Speaker:** Peter Willis, Adjunct Senior Lecturer, University of South Australia  
**Topic:** What are you doing? PhD students and supervisors beginning a qualitative research project

This was a working seminar on early qualitative project appraisal for PhD students in conversation with their academic supervisors. This presumes that you have connected with a supervisor whose general research approach and interests are compatible with your general orientation. The question, “What are you doing?” is a useful one for newcomers to research. The question invites a distancing categorical appraisal in which the material processes of reading, questioning, conversing with colleagues, participating in and observing various research worthy social exchanges are reanimated through a formal process of classification. Peter Willis explained his research, which he developed during student supervision over a 20 year period, based on a ten-point appraisal for early conversations between beginning researchers and their supervisors about the project the student plans to tackle. The seminar introduced the appraisal prompt and the ideas underpinning it before working through each point so that students could consider the advice against their own work.

**Wednesday, 26th November 2014**

**Speaker:** Ophira Ginsburg, medical oncologist and global health researcher with a focus in global cancer control and women’s health equity

**Topic:** Breast and cervical cancer control in low and middle-income countries: a human rights and health policy imperative

In 2012 Ophira led the first ‘call to action’ for Canadian cancer agencies and care providers to become part of the solution to the growing crisis of cancer in developing countries. She developed a new course, ‘Innovative Public Health Approaches to Cancer Care and Control’ at the James P Grant School of Public Health, BRAC University, Bangladesh, which is now offered annually. In October 2012, Ophira was a panelist for the latest global summit of the Breast Health Global Initiative held in Vienna. The meeting was the first to address evidence-based, resource-appropriate guidelines for supportive care and quality of life for breast cancer patients (The Breast Journal, 2013).

Some of Ophira’s recent appointments include: the editorial board of a new open access Lancet Oncology publication, Journal of Cancer Policy (Elsevier, UK); Advisor to the National Cancer Hospital and National Institute for Cancer Control of Vietnam; the Technical Advisory Committee of the Global Task Force on Expanded Access to Cancer Care and Control (GTF, CCC of the Harvard Global Equity Initiative, Boston); and was invited to join the faculty of the Institute of Cancer Policy, King’s Health Partners, London.

**Friday, 28 November 2014**

**Speaker:** Professor Marco Peres, Professor in Population Oral Health and Director of the Australian Research Centre for Population Oral Health, School of Dentistry, University of Adelaide  
**Topic:** Best practice in oral health: examples of how to inform oral health-care providers

The most common oral health diseases and disorders are a public health concern because they impact on individuals’ quality of life and the financial health budget. For these reasons there is an increasing demand for the production and dissemination of the best evidence in oral health care in order to prevent and treat dental diseases and also to minimise costs. This presentation covered three examples of the interface between academia and health services, in different contexts and using different methodological approaches.

Marco’s research areas of interest include Methods in Oral Epidemiology, Life Course Oral Epidemiology, Social Epidemiology, and Surveillance in Oral Health. He served on numerous Brazilian advisory groups including committees of the National Coordination of Oral Health, National Committee for Oral Health Surveillance, and has worked as a consultant for the National Oral Health Survey carried out in 2010 and the National Household Health Survey. Currently he is a regional councillor – Asia-Pacific Region – of the International Association for Dental Research - Global Oral Health Inequalities Network.
Current students

Doctor of Philosophy

Dwyer, Drew Darren
Topic: What difference does positive education in clinical leadership and management have on registered nurses in aged care?

Froessler, Bernd
Topic: Experimental study of anaemia

Larkin, David Anthony
Topic: Energy conservation and management.
(ERAM): a pilot study of the feasibility and efficacy of an intervention for cancer-related fatigue in men treated for prostate cancer

Moola, Sandeep
Topic: Guidelines on management of dental anxiety in paediatric and adult patients: translating evidence into mobile decision support in dentistry

Norton-Westwood, Deborah
Topic: The effectiveness of environmental design strategies to reduce event related anxiety in pediatric patients

Richards, Stephen John
Topic: Towards the development of a 'living environmental stress' theory to describe how the environment of a residential aged care facility may be toxic, resulting in an increased risk of premature morbidity and mortality in older people

Tufanaru, Catalin
Topic: Theoretical foundations of meta-aggregation: insights from Husserlian Phenomenology and American Pragmatism

Xue, Yifan
Topic: Modelling for economic evaluation of indigenous health care services

Chen, Zhili
Topic: The effectiveness of educational strategies on physicians' differential diagnosis of chikungunya fever and other febrile diseases: a systematic review

Master of Clinical Science (Evidence Based Healthcare)

Bellman, Susan
Topic: What is the effectiveness of phamaco-therapeutic interventions for beta cell function preservation among adults with type 2 diabetes

Butenko, Samantha
Topic: The effectiveness of partnering between health professionals and consumers for hand hygiene compliance

Brack, Kerry
Topic: The experiences of specifically designed environment for dementia: a systematic review

Breik, Omar
Topic: Evidence-based review of skeletal relapse in orthogencic surgery

Canuto, Karla Joy
Topic: Obesity prevention and weight loss programs targeted at Aboriginal and Torres Strait Islanders

Chu, David
Topic: The effectiveness of nickel-titanium versus stainless steel instrumentation for non-surgical endodontic therapy: a systematic review

Costi, Jennifer (Jenny)
Topic: Medical education and the role of advocacy

Cundy, William John
Topic: Metal ion release from spinal instrumentation

Davis, Kathryn (Kate) Merice
Topic: Education, clinical learning and organisational culture, leadership

Davy, Carol Patricia
Topic: Understanding closing the gap from the perspective of Aboriginal and Torres Strait Islander people

Doorenbosch, Xenia Rebecca
Topic: A systematic review of predisposing factors in recurrent raised intracranial pressure post cranial vault remodelling for non-syndromic craniosynostosis

Eddy, Kylie Jane
Topic: What factors promote the transfer of education into practice in health professionals

Elliott, Adrian
Topic: Exercise for the reduction of cardiovascular risk factors

Feyissa, Garumma Tolu
Topic: Effect of nutritional supplementation on BMI among HIV patients

Gaffey, Andrew Benedict
Topic: Environmental Influences in pain perception

Gagolkina, Ella
Topic: Capnography monitoring in patients receiving procedural sedation and analgesia: a systematic review

Gall, Dianne
Topic: Effectiveness and meaningfulness of art therapy as a tool for healthy ageing: a systematic review

Glaser, Heather Joy
Topic: The safety and efficacy of topical natural (herbal treatments) for mycotic nail and skin infections in immunocompromised individuals

Hallett, Peter Charles
Topic: Systematic review in cancer rehabilitation

Hayes, Nicholas Lewis
Topic: Systematic review: reverse total shoulder replacements in patients younger than 65 years: clinical outcomes

Heuch, Lisa Mary
Topic: The effectiveness of methods of off-loading to prevent diabetic foot ulcers in adults with diabetes: a systematic review

Hocking, Judith
Topic: Effective assessment of pain in adults with intellectual disability: a systematic review

Hunt, Christine Diane
Topic: Infection prevention in the aged care setting

Isam, Catherine
Topic: Effectiveness of patient involvement in treatment plans in enhancing adherence in therapy for the management of chrome illness: a systematic review

Jacobson, Janelle Robyn
Topic: Best practices for care of aged patients and their carers entering residential facilities

King, Allana Sheree
Topic: A systematic review of nursing leadership styles and ability to effectively influence change and teams
King, Scott  
**Topic:** Context of competency for regulated health professionals

Ko Ko Aung, Edward Wahlu  
**Topic:** The association between suicidality and treatment with selective serotonin reuptake inhibitors in older people with major depression: a systematic review

Kurmis, Rochelle Jade  
**Topic:** The effectiveness of nutritional interventions in the management of burn injury

Leane, Terrence Arthur  
**Topic:** A comparison of fentanyl and alfentanil analgesia when used with midazolam for procedural sedation: an assessment of clinical effectiveness and safety

Manning, Frances  
**Topic:** In what ways are people’s attitudes and beliefs regarding health influenced by the way health is portrayed in the media?

Martin, Stephanie Kay  
**Topic:** The effect of early oral feeding compared to standard oral feeding following total laryngectomy: a systematic review

Mathews, Megan  
**Topic:** The effectiveness of coenzyme Q10 on survival of women with breast cancer

McReynolds, Trish  
**Topic:** Clinical audit in aged care

Mercer, Carmel Anne  
**Topic:** The experiences of Aboriginal health workers and health professionals working collaboratively in the delivery of health care to Aboriginal Australians: a systematic review of qualitative evidence

Morkunas, Bernadette  
**Topic:** PRN medication use in acute mental health care settings

Morshed, Ali Azam Mohammad  
**Topic:** Effectiveness of tight glycaemic control for morbidity and mortality

Newell, Stephanie Mary  
**Topic:** Real time feedback collection tools in use in health care and their influence on the patient experience of care

Parbery, Gordon David  
**Topic:** Epidemiological association between chlorinated water and overall risk of cancer: a systematic review

Patthum, Arisara  
**Topic:** End of life care in intensive care unit: an analysis of clinical effectiveness in nursing

Pearce, Anna Catherine Mauri  
**Topic:** Neuroprotective effects of magnesium sulphate

Pensuk, Prapaphan  
**Topic:** The effectiveness of the Liverpool Care Pathway in end of life care: a systematic review

Reilly, Rachel Elizabeth  
**Topic:** Pre-dialysis care for Indigenous peoples: experiences, gaps, barriers and facilitation of care

Riitano, Dagmara  
**Topic:** Comparative effectiveness of psychological interventions

Robinson, Kai Joshua James  
**Topic:** First attempt success using intraosseous as an alternative to intravenous vascular access in out of hospital cardiac arrest: a systematic review

Saliba, Melissa  
**Topic:** Parent responsiveness and children’s language development: a systematic review

Scheepers, Morné Stephan  
**Topic:** Recovery post orthopaedic surgical procedures

Shekhar, Neema  
**Topic:** The effectiveness of vitamin C for the prevention of premature rupture of membrane and preterm premature rupture of membrane in pregnant women: a systematic review

Taylor, Anita Carol  
**Topic:** The experience and effectiveness of nurse practitioners in orthopaedic settings: a comprehensive systematic review

Tilley, Erica  
**Topic:** The prevalence of a neurological atypical Parkinson’s plus condition, progressive supranuclear palsy, and an appropriate clinical care plan pathway to improve access to existing health services in South Australia

Townshend, Kishani Samantha  
**Topic:** Impact of mindful parenting on children’s school attendance and resilience: the development and pilot testing of a mindful parenting program

Tume, Cathy  
**Topic:** Recognising and responding to clinical deterioration - best practice rescuing deteriorating patients in small non metropolitan hospitals (without met team)

Tyndall, Jessica Dorothy  
**Topic:** Impact of findings from grey literature on the outcomes of systematic reviews on interventions to prevent obesity among children: a systemic review

Vivera, Manuel Joseph  
**Topic:** The effectiveness of ayurvedic nasal instillation medicines in the treatment of arthritis, rheumatic diseases and in trauma management: a systematic review

Walters, Stephen John  
**Topic:** An integrative medicine approach to injured worker rehabilitation in South Australia

White, Heath  
**Topic:** A comparison of the safety and effectiveness of radical prostatectomy versus observation in men with prostate cancer

Whiteford, Caroline Louise  
**Topic:** A systematic review of nurse-led ear clinics - external outpatient model for SA Health
Research

Research funding awarded in 2014

Systematic review on magnitude and scope of ‘non-communicable disease-related disability: implications for policy and practice’
AUD$95,000
Funding organization: World Health Organization (WHO)
Staff: Assoc Prof Craig Lockwood, Dr Karolina Lisy, Dr Jared Campbell, Dr Catalin Tufanaru, Assoc Prof Edoardo Aromataris, Mr Sandeep Moola, Dr Yifan Xue, Dr Kyawt Kyawt Swe, Mr Vincent Chu

October 2014 – June 2015
Systematic reviews of Quantitative and Qualitative Evidence on the Impact of Microfinance in South Asia
GBP42,080
Funding organization: EPPI Centre, UK
Staff: Assoc Prof Craig Lockwood, Dr Micah Peters, Mr Sandeep Moola, Dr Zachary Munn, Assoc Prof Edoardo Aromataris, Dr Kyawt Kyawt Swe, Mr Vincent Chu
External Collaborator: Prof RK Mishra

Sept 2014 – Dec 2014
Safe management of expressed breast milk
AUD$20,800
Funding Organization: Sax Institute, New South Wales
Staff: Mrs Alexa McArthur, Dr Zachary Munn, Dr Micah Peters, Mr Vincent Chu

Systematic review on magnitude and scope of ‘non-communicable disease-related disability: implications for policy and practice’
AUD$95,000
Funding organization: World Health Organization (WHO)
Staff: Assoc Prof Craig Lockwood, Dr Karolina Lisy, Dr Jared Campbell, Dr Catalin Tufanaru, Assoc Prof Edoardo Aromataris, Mr Sandeep Moola, Dr Yifan Xue, Dr Kyawt Kyawt Swe, Mr Vincent Chu

Research projects ongoing from 2013

January – June 2014
A multi-site audit of current in-hospital falls prevention practices and assessment of the effectiveness of best practice implementation strategies
AUD$265,000
Funding organisation: Hospitals Contribution Fund of Australia (HCF) Health and Medical Research Foundation
Staff: Prof Alan Pearson, Assoc Prof Edoardo Aromataris, Assoc Prof Craig Lockwood, Dr Matthew Stephenson, Mrs Alexa McArthur, Dr Kristy Giles

January – November 2014
Use of surgical and radiology checklists in Australian hospitals: uptake, barriers and enablers (with Australian Patient Safety Foundation [APSF])
AUD$310,000
Funding organisation: Hospitals Contribution Fund of Australia (HCF) Health and Medical Research Foundation
Staff: Prof Alan Pearson, Assoc Prof Edoardo Aromataris, Dr Zachary Munn, Dr Kristy Giles
External Collaborators: Prof William Runciman, Dr Catherine Mandel, Prof Guy Maddern, Dr Tim Schultz

October 2013 – October 2018
Centre of Research Excellence in Aboriginal Chronic Disease Knowledge Translation and Exchange (CREATE)
AUD$2,483,000 (over five years)
In collaboration with the South Australian Health and Medical Research Institute (SAHMRI), National Aboriginal Community Controlled Health Organisation (NACCHO) and School of Population Health (SPH), University of Adelaide
Staff: Assoc Prof Edoardo Aromataris, CID; Mr Heath White, Program Manager; Dr Judith Streak Gomersall, Research Fellow; Mrs Pamela Fletcher, Administrative Assistant; Assoc Prof Zoe Jordan, AI; Assoc Prof Craig Lockwood, AI; Dr Zachary Munn, AI; Mr Sandeep Moola, AI; Mrs Alexa McArthur, AI; Dr Matthew Stephenson, AI; Dr Catalin Tufanaru, AI
External Collaborators: Prof Alex Brown, Centre Director, CIA (SAHMRI); Prof Annette Braunack-Mayer, CIB (SPH); Prof Ngiare Brown, CIC (NACCHO); Dr Karla Canuto, Research Fellow (SAHMRI); Mr Stephen Harfield, Research Fellow (NACCHO); Dr Odette Gibson, AI (SAHMRI); Dr Carol Davy, AI (SAHMRI); Ms Elaine Kite, AI (SAHMRI); Ms Kim Morey, AI (SAHMRI); Ms Renee Williams, AI (APUNIPINA); Dr Drew Carter, AI (SPH); Dr Jackie Street, AI (SPH)

October 2013 – July 2014
Annotated Bibliography of associations between genotype and cancer treatment related toxicity
AUD$6,400
Funding organization: SA Health
Staff: Dr Jared Campbell, Dr Yifan Xue, Assoc Prof Edoardo Aromataris

Jan 2013 – June 2014
A multi-site audit of current in-hospital falls prevention practices and assessment of the effectiveness of best practice implementation strategies
AUD$265,000
Funding organisation: Hospitals Contribution Fund of Australia (HCF) Health and Medical Research Foundation

In response to the lack of evidence-based guidance for healthcare staff regarding the best approach to caring for and supporting families experiencing stillbirth, a recent research project conducted by the Joanna Briggs Institute and supported by the Stillbirth Foundation Australia has developed three professional guidance documents. These documents have been prepared using results from a comprehensive systematic review of the available international research. Providing support, being sensitive, empathetic, and validating parents’ emotions are essential features of meaningful care for families that have experienced stillbirth. Accurate and understandable information and collaborative decision-making throughout the experience of stillbirth is crucial, and can have a profound impact on parents’ experiences.

“This systematic review is important because parents are often unprepared for the experience of stillbirth and are at risk of detrimental psychosocial effects including grief, depression and self-blame,” said the project’s chief investigator and Director of Synthesis Science at JBI, Associate Professor Edoardo Aromataris. The review confirmed that actions, behaviours and communications of healthcare professionals during their interaction with parents and their stillborn baby can have a considerable impact on the parents’ psychological well-being.

Furthermore, healthcare professionals may themselves be emotionally affected by stillbirth, which can influence their interaction with parents. These guidance documents are available via the Stillbirth Foundation Australia website along with the full systematic review. The first document relates to the time preceding birth, from just prior to diagnosis until birth. The second document relates to the birth itself, and the third presents implications relating to ongoing and follow-up care for families. Each document presents evidence-based guidance for best practice, as well as input from an expert advisory group of perinatal researchers, clinical staff and parents who have experienced stillbirth. The availability of the report to inform future practice guidelines will be highlighted to relevant groups and associations Australia-wide.

“The systematic review carried out by researchers at the JBI provides meaningful and useful information that can immediately be translated into practice,” said CEO of the Stillbirth Foundation Australia, Jan Samuels. “With six babies being stillborn every day in Australia, it is critical that parents, and the health professionals who care for them, are well supported. We see this study as an important addition to our body of knowledge and the impact of stillbirth on families.”

www.stillbirthfoundation.org.au
2014 provided us with an opportunity to reflect on what we have achieved, and focus on where we might go, as an organisation.
Governance

Committee of Management
(Held jointly with the Executive Committee, School of Translational Health Science [STHS])
Details are the same as the Executive Committee of STHS

Advisory Committee of the Joanna Briggs Institute
Chair: Hon Rob Knowles AO
Secretary: Mrs Julie Sulda
Minute Secretary: Mrs Julie Sulda
Members: Mr Steven McDonald, Dr Lesley Long AM, Prof Margaret Harrison, Dr Ian Graham, Prof Alastair Burt, Ms Kathy Mott, Prof Jos Kleijnen, Prof Gerd Antes, Prof Julie Owens, and (ex officio) Assoc Prof Zoe Jordan
Meetings: Four times a year, including one face-to-face meeting
Reporting to: Dean of Faculty of Health Sciences

Scientific Committee
Chair: Dr Zachary Munn
Secretary: Mrs Julie Sulda
Minute Secretary: Mrs Pam Fletcher
Members: Executive Director; Directors; one member elected by each of the Synthesis Science Unit, Implementation Science Unit, Communication Science Unit; and one Centre Director (or nominee) elected by each of the European Region, Central Region, Asian Region, Americas Region and Australasian Region. Other members from the Centres may be co-opted by the Committee to serve on Methodology Working Groups.
Meetings: Every quarter
Reporting to: STHS School Board via JBI Report to the Board

Committee of Directors (CoD) of the Joanna Briggs Collaboration
Chair: Assoc Prof Zoe Jordan
Secretary: Mrs Julie Sulda
Minute Secretary: Ms Bianca Pilla
Members: Executive Director (Chair), all JBC Centre Directors and executive staff of The Joanna Briggs Institute
Meetings: Three times a year - twice via teleconference plus one face-to-face meeting that alternates between Adelaide and the location of the biennial Colloquium.

JBI Impact Evaluation Working Group
Chair: Dr Rosemary Woods
Minutes: Dr Rosemary Woods
Members: Prof Margaret Harrison (Canada), Dr Fiona Bath-Hextall (UK), Prof Hu Yan (China), Mr Nick Scheponik (USA), Ms Anne Woods, (USA), Ms Tiffany Conroy (Australia), Ms Susan Weeks (USA), Dr Susie Jones (USA), and the executive staff of the Joanna Briggs Institute
Meetings: Once a month by teleconference

JBI Quality Evaluation Working Group
Chair: Dr Lisa Hopp
Minutes: Dr Lisa Hopp
Members: Prof Heather Loveday (UK), Assoc Prof Patraporn Tungpunrom (Thailand), Dr Richard Wiechula (Australia), Prof Robin Watts (Australia), Assoc Prof Tracy Merlin (Australia), Assoc Prof Trish McInerney (South Africa), Prof Margaret Harrison (Canada), Mr Shawn Kennedy (USA), and the executive staff of the Joanna Briggs Institute
Meetings: Once a month by teleconference
Scientific Development Program

Scientific development is an important priority for the Institute.

For almost 20 years, the Joanna Briggs Institute has been a world leader in providing methodological guidance for the conduct of systematic reviews and evidence implementation.

In addition, JBI has developed software for developing systematic reviews, the System for the Unified Management, Assessment and Review of Information (SUMARI). The SUMARI software is planned to be completely rebuilt in 2015 to incorporate new advances in systematic review methodology. In the lead up to this redevelopment, the Joanna Briggs Institute and its international collaboration have spent time updating, revising and developing new guidance for systematic reviews to inform the new version of SUMARI. The Institute this year invested significant resource in developing four new methodology groups in addition to the seven ongoing groups comprising experts from across the Joanna Briggs Institute and the Joanna Briggs Collaboration to examine our methodologies in relation to the conduct of systematic reviews of different evidence types. Each group either revised existing methodologies or developed new ones as required. Additionally they developed guidance for reviewers, which will be available in 2015 and incorporated into the JBI 2015 Reviewers Manual and the redeveloped SUMARI software.

The new methodological groups for 2014 include:

1. The synthesis of evidence of effects (JBI MASTARI)
2. The synthesis of qualitative evidence (JBI QARI)
3. The synthesis of economic evidence (JBI ACTUARI)
4. The synthesis of the findings of incidence, prevalence and descriptive studies (New Analytical Module)
5. Methodology for Umbrella/Overview reviews (New Analytical Module)

Text and Opinion Reviews working group
This group has looked at the existing methods and methodologies for systematic reviews of text and opinion along with the associated JBI SUMARI module, NOTARI. They have completed a revision of the chapter for the JBI Reviewers Manual, and are working on new reviews for submission to the Joanna Briggs Institute Database of Systematic Review and Implementation Reports. The group is progressing with methodology towards recommendations and guidance for instances when a review of text and opinion is not only necessary but the ideal methodological choice.

Association Reviews working group
This group has been looking at methods and methodologies related to the conduct of reviews of non-causal associations, including questions that may relate to risk, harm or correlational data. This is a new methodology for the Institute and there is no current chapter in the JBI Reviewers Manual or any associated software. The group has reviewed and updated the JBI critical appraisal tools for observational studies, and developed guidance for meta-analysis of this type of data.

Diagnostic Test Accuracy Reviews working group
This group has been looking at methods and methodologies related to the conduct of diagnostic test accuracy reviews. This is a new methodology for the Institute and there is no current chapter in the JBI Reviewers Manual or any associated software. A new chapter has been developed for publication in the JBI Reviewers Manual and specification for the redeveloped SUMARI software. The methodology is currently being piloted in two systematic reviews to be published in the Joanna Briggs Institute Database of Systematic Reviews and Implementation Reports.

Scoping Reviews working group
This group has been looking at methods and methodologies related to the conduct of scoping reviews. The group has recommended that scoping reviews should aim to be more general than a traditional systematic review, with a more inclusive approach to provide an overview of the existing knowledge base. As such, critical appraisal is not required in such reviews.

Implementation
The JBI framework for implementation science draws upon the best available evidence regarding dominant theories about organisational systems, change management, knowledge translation, translation research and implementation science.
A large factor associated with the wide impact of JBI, both in Australia and worldwide, is attributed to JBI’s commitment to synthesising the best internationally available evidence and providing this information in appropriate, relevant formats to inform health systems, health professionals and consumers. JBI provides programs to enable the effective implementation of evidence and evaluation of its impact on healthcare practice.

**SUBSCRIBING COUNTRIES**

28

JBI has over 70 Collaboration Centres, and organisations from 28 countries subscribing to JBI resources (The top subscribing countries being Australia, USA, Canada and Finland), with developing countries able to access JBI resources free via Hinari.

**COLLABORATION CENTRES**

70+

**OUR GLOBAL REACH**

Global - $4.5 MILLION

Amount of funding (AUD) raised through research projects undertaken from 2011 to-date

**RESEARCH**

The Joanna Briggs Institute has developed a framework for impact evaluation that will guide a programmatic approach to evaluation to inform JBI, not only about the volume of utilisation of JBI resources, but also the impact of utilisation of JBI resources by subscriber organisations and clinicians on patient outcomes.

Furthermore, the approach will encompass the scientific impact of JBI operations and its staff. It will include measures for the adoption of evidence in clinical practice, improvements to patient outcomes, public discourse, scholarship, access and download rates, and awareness.

As part of the impact evaluation the 2014 report ‘Our Impact’ has now been posted on the JBI website. Some of the pages from the on-line PDF can be seen on the left.

**Impact evaluation**

Taking on research projects reinforces JBI’s mission belief that the very best healthcare should be delivered with the very best evidence available.

Some of the pages from the on-line PDF can be seen on the left.
**Highlights**

This year has been a really successful one for the Institute in relation to the international expansion of its short course program. Comprehensive Systematic Review Training conducted by the JBI Global Training Team has increased by 50%. This has also been the first year that the Clinical Fellowship Program has been conducted by the JBI Global Training Team.

We now have 67 licensed trainers in our Global Training Team who are conducting training in the JBI approach to evidence synthesis and implementation across the world.

The JBI Database of Systematic Reviews and Implementation Reports

The JBI Database of Systematic Reviews and Implementation Reports is the first journal in the JBI Library. The journal publishes systematic review protocols and systematic reviews of healthcare research that follow JBI review methodologies. The journal also publishes the Institute’s implementation reports that present the findings of projects that seek to improve healthcare processes by implementing the best available research evidence in practice. The JBI Database of Systematic Reviews and Implementation Reports is currently indexed in Embase, Scopus, Mosby’s Index (Elsevier) and CINAHL (EBSCO). Users of JBI ConNNECT+ also now have access to the content of the journal via the journal’s online interface.

International Journal of Evidence Based Healthcare

The International Journal of Evidence Based Healthcare (IJE BH) is now published by Wolters Kluwer Health/Lippincott Williams & Wilkins, and can be accessed online at: http://journals.lww.com/ije/bh/pages/default.aspx. Four issues were published in 2014 in March, June, September and December. The issues contain articles that relate to the synthesis, transfer and utilisation of evidence and also a Cochrane Nursing Care Corner that includes summaries of Cochrane Reviews that relate to nursing practice.

Highlights

The International Journal of Evidence-Based Healthcare, the official Journal of the Joanna Briggs Institute, has completed a successful first year with Wolters Kluwer Health/Lippincott Williams & Wilkins in 2014. Traffic to the journal online and on Ovid had a promising trend, with April 2014 seeing the most site visits.

In June 2014, Dr Hanan Khalil commenced as Editor-in-Chief and Helen Chambers as Managing Editor.

In 2014, the journal featured Society for Trauma Nurses Conference in April and the Australian Disease Management Association Conference in September. Lippincott Williams & Wilkins will again feature the IJE BH at these conferences for 2015.

In 2014 there were 11,005 visits to the IJE BH website, and 9861 of these were unique visitors. Each visitor spent an average of one minute on the journal’s website. Visitors from the United States, Australia and the United Kingdom visited the journal the most frequently. The journal is being viewed around the world and is available to institutions through the Ovid platform. Ovid is used in institutional settings, healthcare institutions and academic settings. The majority of end users are researchers or those interested in implementing evidence-based practice within their organisations. The Ovid usage has seen significant growth over the course of 2014. (A total of 13,011 articles accessed over 7722 sessions.)

Best Practice Volume

The following Best Practice Information sheets were published in 2014:

- Effectiveness of parent-centred interventions for the prevention and treatment of childhood overweight and obesity in community settings
- The experience and role of a companion during normal labor and childbirth
- Recommencing oral feeding and the risk of pharyngocutaneous fistula formation following total laryngectomy.

The 9th Biennial Joanna Briggs International Colloquium

Themed ‘Scaling New Heights: Challenging the Status Quo’, the 9th Biennial Joanna Briggs International Colloquium was held on 10-12 November 2014 at the Holiday Inn, Singapore.

The Colloquium was co-organised by the three Singapore Joanna Briggs Institute Collaborating Centres: the National Healthcare Group Health Services and Outcomes Research (HSOR) Collaborating Centre for Evidence Based Health Services Management, the National University Hospital (NUH) Centre for Evidence-Based Nursing, and the JBI Institute of Mental Health (Singapore) Centre for Evidence-Based Practices in Mental Health Care.

Over 360 delegates from 32 countries attended the event. Five plenary sessions, two debates, 90 concurrent sessions, four methodology workshops, one symposium and 69 posters saw delegates explore new frontiers for health care in a diverse world, challenging current policies in relations to issues around the benefits of e-health, the usage of social media to support larger numbers of patients and maximising the best evidence at the point of care, to name a few.

At the Colloquium’s Gala Dinner, delegates were treated to an opening act performed by a troupe of enthusiastic young ladies.

These talented girls dazzled all with a symphony of sounds and songs performed only with bells and symbols.

Local rock star Suf Supiani sang tracks from his reflective solo album that he wrote as an outpatient of the JBI Institute of Mental Health (Singapore) Centre for Evidence-Based Practices in Mental Health Care. A sumptuous eight-course Chinese banquet capped the night.
1. Young musicians from a local girls high school
2. Colloquium participants at one of the plenary sessions
3. Colloquium Award winners
4. Prof. Emily Ang, Director, The Singapore National University Hospital Centre for Evidence-based Nursing: a Collaborating Centre of The Joanna Briggs Institute
5. Assoc. Prof. Zoe Jordan Acting Executive Director, JBI
6. Prof. Emerita Margaret Harrison, Director, Queen’s Joanna Briggs’ Collaboration for Patient Safety: a Collaborating Centre of The Joanna Briggs Institute
7. Participants found the colloquium to be engaging and enjoyable
8. Dr Sally Wilson, Director, The Western Australian Centre for Evidence Informed Healthcare Practice: an Affiliate Centre of The Joanna Briggs Institute
9. The audience ‘voting’ during one of the debates
Mindful of this, JBF is working to raise funds that enable health professionals from developing nations to travel to Adelaide, South Australia, to undertake training with the JBI in their most critical areas of need.

Extending the reach to Indigenous communities in Australia

Within Australia, JBF also funds health improvement programs and for Indigenous communities. In partnership with the South Australian Medical Research Institute and the National Aboriginal Community Controlled Health Organisation (NACCHO), JBI leads a Centre for Indigenous Health Research funded by the National Health and Medical Research Council of Australia. Through JBF, the best practice work of JBI can be made available both to developing nations and to Indigenous communities in Australia. Our Evidence Based Clinical Fellowships Program for developing countries has already changed health practices and is saving thousands of lives through best practice, evidence-based health care.

The Foundation is supported by a Special Advisory Committee to assist the Fundraising Manager in raising much needed funds to support the work of JBI.

Fundraising Manager

Ms Sandy Davis

Fundraising activities

Advertiser Grease Luncheon

The Advertiser Foundation hosted a special “Grease” luncheon at the Adelaide Festival Theatre and JBF was one of two beneficiaries. The function featured the cast of the Australian Musical ‘Grease’, Gretel Scarlett, Rob Mills, Todd McKenny and the special guest star was Nathaniel Willemse, a finalist from The X Factor Australia. The luncheon raised AUD $20,000.

Corporate Cocktail Function

The Joanna Briggs Foundation hosted a corporate cocktail function for supporters and sponsors on 16 October in the stunning new state-of-the-art Bendigo Building in Adelaide.

Guests were greeted by an amazing duo from the University of Adelaide Medical Orchestra, playing the cello and violin, and from the banquet room they enjoyed spectacular views of Adelaide from the sea to the hills.

Over 80 personally invited guests from the corporate sector of Adelaide enjoyed an introduction to a South Australian success story that is changing lives around the world.

Guests enjoyed fine wine donated by Andrew Kay, Chief Executive Officer of Wirra Wirra Vineyards and JBF Advisory Committee member of the Foundation.

Sponsorship and donation

The Foundation is currently working with several corporate organisations in South Australia who are supportive of the work of the Institute in the areas around the world that need it most. If you would like to assist us, please contact JBF Manager, Sandy Davis, to discuss a suitable program for your organisation.
JBI is committed to making a positive contribution to the communities that we serve, both in Australia and overseas.

A collaboration without borders

JBI is proud to collaborate internationally with over 70 entities (centres and groups) located across the world. The Joanna Briggs Collaboration promote and support the synthesis, transfer and implementation of evidence through identifying feasible, appropriate, meaningful and effective healthcare practices to assist in the improvement of healthcare outcomes in communities globally.

Since humble beginnings in 1996, the Joanna Briggs Collaboration has become a robust and democratic union of minds that continues to grow and thrive across international borders.
Introduction

Development of the Americas Group’s terms of reference and guiding principles:
The JBI Americas Group comprises all JBI North and South American Centres (Collaborating and Affiliate).
Its purpose and aims are to develop an America’s community of practice to generate knowledge through the science of evidence synthesis and to promote uptake of this evidence in clinical practice.
Coordination of the meetings is undertaken on a rotational basis. The first meeting was held in 2011 in Indiana.
The members of the group set the agenda for each meeting. The guiding principles for the group are currently under development.

Centres (Collaborating and Affiliate)

There are currently 13 centres representing three countries in North and South America. The current centres in the Regional Group, their directorships and contact details are shown in the following table.

### Further information

Further information on the centres and their specific work, interests and expertise can be found on the Joanna Briggs Collaborating Centres webpage at: http://joannabriggs.org/jbc.aspx

### Meetings, conferences, networks

The first meeting of the Americas Group was held in 2011 to:

> Develop a formal network of JBI collaborating centres in the Americas to advance the science of knowledge use.
> Formulate a network plan that provides linkages and greater integration among existing and developing centres.
> Establish mechanisms to sustain the network’s efforts to serve as a JBI community of practice.
> Schedule a future meeting and discuss future agenda items.

The meeting addressed two key questions:

1. In forming a community of practice, what are the things this group can better achieve collectively than as individual entities?
2. What should be the initial strategic plan to begin the process?

Our plan going forward is to build on the existing linkages amongst North and South American evidence-based nursing practice centres affiliated with JBI. A formalised Americas community of practice will greatly enhance our main function: integrating evidence into practice.
Collaborative work
The Americas Group's ongoing collaborative systematic reviews and their members work with JBI are illustrated below:

Plans for the coming year
The second face-to-face meeting of the Americas Regional Community of Practice will be held in Indiana on 1 - 3 October 2015.
Introduction

The Asian Group’s terms of reference and guiding principles:

The JBI Asian Group comprises all JBI Asian Centres (Collaborating and Affiliate).

The purpose and aims are to strengthen the networking relationships between Asian Centres and to share experiences and strategies to integrate varied streams of evidence into culturally different healthcare settings.

Centres (Affiliate and Collaborating)

There are currently 13 Centres representing eight countries in Asia. The current centres in the Regional Group, their directorships and contact details are shown in the following table:

Meetings, conferences, networks

22 October, 2013 (Adelaide Convention) Strategic Alliance for Evidence Based Practice: Challenging Barriers with Sharing Experience in Asian Region

The purpose of the Asian Nursing Panel was to discuss how to facilitate and implement evidence-based practices among Asian regions of the JBI. Given the limited information about outcomes of nursing services, this panel shared experiences on challenges and strategies to strengthen and integrate varied streams of evidence into nursing. Panelists included JBI Asian regional Directors with extensive knowledge in evidence generation and consumption from China, Myanmar, India, Japan, Korea, Philippines, Singapore, Taiwan and Thailand.

10 - 12 November 2014 9th Biennial Joanna Briggs international Colloquium, Singapore

The theme of the colloquium was ‘Scaling New Heights: Challenging the Status Quo’. The colloquium was attended by 357 delegates from 32 countries. There were five plenary sessions, two debates, six methodology workshops, 90 oral and 69 poster presentations, and one lunch symposium.

13 November 2014 (Singapore Committee of Director’s Meeting) AP-JBI Networking Planning meeting

The Asian centres’ representatives discussed future collaborative and sustainable activities among Asian-Pacific (AP) JBI centres. The Annual AP-JBI conference/forum was considered as one of the possible activities. The Korean Centre has proposed to host the inaugural AP-JBI conference in 2016, celebrating the 10th anniversary of launching JBI. This will be confirmed after discussions with administrative persons at the centre. The Indian Centre proposed to host a future conference on health technology in 2016. The Fudan Centre is planning to host an AP-JBI consortium in 2016 or 2017, but this will be confirmed after discussion with university administrative offices.

Introduction
The Australasian JBC Regional Group has been meeting since 2011 at each annual JBI Committee of Directors meeting, coordinated by Prof Bridie Kent and then Prof Robin Watts. In each of the JBI committee of Directors (COD) annual meetings the Australasian Regional group has focussed on matters relating to the methods, conduct and training of systematic reviews and implementation projects as well as development of new evidence based summaries. More recently several centres from the Australasian region have been collaborating on research concerning aged care – the JBI Healthy Ageing Collaboration (JBIHAC) group, initially set up by Prof Alison Kitson and more recently coordinated by Dr Rick Wiechula.

Aim
The main aim of the Australasian JBC Regional Group is to provide a forum for supporting and facilitating the activities of the collaborating/affiliate centres in the JBI Australasian region:

Objectives
> Discuss issues arising in conducting the business of each of the centres
> Coordinate responses to JBI issues across the Australasian region
> Share strategies for maximising the success of centres
> Develop subgroups of expertise in the synthesis, translation and implementation activities

Guiding principles
> Centres will promote and support the JBI vision, mission and model within our geographic region

Annual activities/highlights
> Attendance at the annual face-to-face JBI Committee of Directors meeting

Centres (Affiliate and Collaborating)
There are currently 11 Centres in the Australasian region. The current centres and their contact details, are shown in the following table:

<table>

Meetings, conferences, networks

Frequency:
> Annual face-to-face meeting to coincide with the CoD meeting
> Teleconference/Skype/emails as required

Summary of meeting in Singapore 2014:
> Information sharing and support with current and future initiatives.
> Australasian representatives were elected for:
  - Coordinating activities of Australasian Region
  - The JBI strategic planning committee
  - An Alumni Representative for Clinical Fellows selected

Collaborative work

Healthy Ageing Project:
Centres in the Australasian Region with a role, expertise and/or primary interest in healthy ageing have been collaborating on the Healthy Ageing Project, in order to conduct high-quality evidence-based research to improve the health of older Australasians. The initial focus of this project has been on undertaking umbrella reviews on Healthy Ageing and Nutrition. One such umbrella review currently in progress is titled ‘Nutritional interventions for optimising health body composition in older adults in the community’.

Further work of this collaborative group includes working with JBI Adelaide to publish the work of its evidence summaries and recommended practices. A manuscript detailing the work of the Chronic Diseases Management centre was accepted in the journal, ‘Worldviews on Evidence Based Nursing’ and will be in print later this year.

Centres currently involved in this work (in relation to set topic areas) include:
> The Centre for Evidence-Based Practice South Australia
> The Queensland Centre for Evidence Based Nursing and Midwifery (QCEBNM)
> Australian Centre for Evidence Based Community Care (Blue Care)

Note: We thank the CSIRO Food and Health Affiliate centre for their past contributions and collaboration with this project. Due to their recent dissociation from JBI they are no longer involved.

Collaboration in systematic review training:
The Queensland Centre for Evidence Based Nursing and Midwifery has conducted systematic review training workshops with both the Blue Care Centre and the Centre for Evidence Based Health Ageing.

Noteworthy projects
Dr Hanan Khalil from the Chronic Disease Management node has been successful in obtaining a grant from Gippsland Regional Integrated Cancer Services and Latrobe Community Health Services to draft medication safety guidelines for use in the community by nurses.

Sonia Hines from The Queensland Centre for Evidence-Based Nursing and Midwifery, together with a group from The Queensland University of Technology’s Dementia Collaborative Research Centre, were successful in obtaining a $30,000 Dementia Research grant to conduct a systematic review, ‘The effectiveness of meaningful occupation interventions for people with dementia in residential aged care’.

Plans for the coming year
The main collaborative work planned for the coming year includes another umbrella review by the Healthy Ageing Project on physical activity, and the environment for older adults.
Introduction
The Central region consists of affiliate and collaborating centres on the African continent. These are Cameroon, Ethiopia, Ghana, Kenya and South Africa (Johannesburg). There are also three evidence synthesis groups – Nigeria, Botswana and South Africa (Durban). All the groups are committed to generating evidence synthesis and to promoting evidence based practice.

One of the guiding principles of the centres’ activities is to develop a strong regional presence within the JBI collaboration. Unfortunately distance and the cost of airfares within Africa prevent the centres and groups from meeting on a regular basis in face-to-face meetings. A Google group has been formed to facilitate communication between the centres and is fairly successful, but tends to be used mainly for operational purposes rather than discussion.

Meetings, conferences, networks
Apart from the regular JBI teleconference meetings and the face-to-face Committee of Directors meeting at the annual colloquium, the centres have not engaged in any regional meetings.

Dr Morankar from the Ethiopian centre presented a paper at the 1st AEN (Africa Evidence Network) Conference held in Johannesburg, South Africa in November 2014.

Cameroon, the Ethiopian and South African (Wits) centres provided CSR training in 2013 and the Ethiopian and Ghana centres in 2014.

Collaborative work
Dr Morankar was active in promoting comprehensive systematic review training in Uganda and Nigeria and registered the Ethiopian Malaria Alert Centre as a member of the University of Johannesburg based African Evidence Network (AEN).

The Cameroon Centre for Evidence Based Healthcare centre joined AEN in 2013 and the University of the Witwatersrand Centre for Evidence Based Practice (South Africa) joined in 2012. Dr Morankar is currently working with the Ugandan Centre on four systematic reviews.

African Centres

Cameroon Centre for Evidence Based Healthcare (CCEBHC): an Affiliate Centre of the Joanna Briggs Institute
Director: Asahngwa Constantine
Deputy Director: Chelea Matchawe
Address: BP, 8803, Yaounde 14, Yaounde, Cameroon

The Ethiopia Malaria Alert Centre: a Collaborating Centre of the Joanna Briggs Institute
Director: Prof Morankar Sudhakar  Deputy Directors: Mirkuzie Woldie and Lakew Abebe

The Kintampo Health Research Centre: a Collaborating Centre of the Joanna Briggs Institute
P. O. Box 200, Kintampo, Ghana
Director: Dr. Yeetey Enuameh
Deputy Director: George Adjei

Joanna Briggs Centre for Evidence Synthesis
College of Health Sciences School of Public Health, Makerere University, P. O. Box – 7072, Kampala, Uganda
Convenor: Christine Muhumuza

Kenya Medical Research Institute (KEMRI) Centre for Geographic Medicine Research: an Affiliate Centre of the Joanna Briggs Institute
Gertrude’s Children’s Hospital, Nairobi
Director: Dr Leah Mwai
Deputy Director: Dr Samson Gwer

The Witwatersrand Centre for Evidence Based Practice: an Affiliate Centre of the Joanna Briggs Institute
University of the Witwatersrand, Johannesburg, South Africa
Director: Assoc Prof Patricia Mcinerney
Deputy Director: Dr Jayati Basu
Noteworthy projects

The Ethiopian Malaria Alert Centre: a Collaborating Centre of the Joanna Briggs Institute received:

> funding from the UK Based NGO INASP (International Network for the Availability of Scientific Publications) to implement a project titled ‘Building research utilization capacity of health planners and policy makers at the Federal Ministry of Health In Ethiopia’. The funding is for the period 1 December 2014 to 30 November 2015

> a grant from USAID – Ethiopia for the implementation of a project titled: ‘Advancing Community’s Practice on Prevention and Control of Malaria Through Schools and Faith Based Malaria Prevention Approach in Jimma Zone’. This funding is for the period Oct 2013 to Sept 2016.

The Kintampo Health Research Centre: a Collaborating Centre of the Joanna Briggs Institute submitted two review proposals to the United Kingdom Economic and Social Research Council’s (ESRC) Evidence Synthesis Research Awards (ESRA), but unfortunately they were not successful.

On a positive note the centre transitioned from an affiliate to a collaborating centre in 2014.

The Kenya Medical Research Institute (KEMRI) Centre for Geographic Medicine Research: an Affiliate Centre of the Joanna Briggs Institute’s notable projects include partnering with Afya Research Africa in the SHOPS project (with support from the Health Enterprise Fund, a local NGO to create a network of community health kiosks). These innovative community health kiosks are aimed at bringing quality health services closer to remote communities.

Members of the core team at The University of the Witwatersrand Centre for Evidence Based Practice: an Affiliate Centre of the Joanna Briggs Institute have had a protocol approved for a systematic review looking at extrinsic and intrinsic factors associated with non-contact injury in adult pace bowlers. Having our national cricket side, the Proteas, among the top teams in the world, we look forward to hearing the results of this review.

Plans for the coming year

Comprehensive systematic review training forms the core of plans for all the centres in 2015.

Ethiopia has planned CSR training for March, May, September and November 2015. There will be two sessions in May, with one being held at Mekelle University in Ethiopia, Cameroon in May 2015, South Africa (Wits) in June 2015 and Ghana in May, July and November 2015.

The Ethiopia Centre’s future plans include finalising collaboration with EVIDNET at Institute of Tropical Medicine, Antwerp, Belgium. This collaboration is aimed at developing evidence based health care.

All centres are committed to advocating for JBI in the year ahead through a variety of means, such as CSR training, attending national and international conferences and applying for grants.

Top. Colleagues from Centres across Africa enjoy the Singapore Colloquium.

Bottom.
Ms Leah Mwai addresses the Colloquium
Introduction

The JBI European Group comprises all JBI European Centres (Collaborating and Affiliate). Its purpose and aims are to strengthen the working relationships between European centres, enhance the production of evidence syntheses and improve our opportunities for applying for EU funding. The specific aims of the group are to:

> Develop a coherent and strong regional presence within the JBI Collaboration
> Develop peer support and working partnerships among European Centres to support and extend JBI collaborative activity
> Pool expertise and resources to pursue appropriate research, synthesis and translation activity including funded projects
> Coordinate regional responses to issues raised by the JBI research centre

The Group meets face-to-face twice a year, once in Europe (Spring) and once at the Convention/Colloquium (Autumn) and via SKYPE/teleconference in between face-to-face meetings. Virtual meetings are scheduled as required for specific projects with an expectation that there will be one SKYPE/teleconference between face-to-face meetings.

The spring meeting normally includes at least a half-day symposium. The date and host of the spring meeting will be decided at the preceding spring meeting. The host of the spring meeting and symposium will offer a meeting venue at no cost to JBI collaborating centres.

Coordination of the meetings is undertaken on a rotational basis. Two Centre Directors will be nominated at each face-to-face meeting to coordinate and chair the virtual and face-to-face meetings the following year. Normally, the role of the chair will be taken by the deputy chair the following year. The members of the group set the agenda for each meeting. The spring meeting normally provides the opportunity to share experiences, identify collaborative opportunities, undertake working group activity and engage with a range of stakeholders and academic colleagues. In addition, meetings provide the opportunity to discuss issues arising from JBI/University of Adelaide and the Committee of Directors meetings/teleconferences.

The guiding principles for the group can be found in Appendix I.

Centres (Affiliate and Collaborating)

There are currently 12 centres representing nine countries in Europe. We welcome new centres joining the Joanna Briggs Collaboration to the Group and hope they join us in future collaborations and projects of European and Global significance. The current centres in the Group, their directorships and contact details are shown below:

Meetings, conferences, networks

Annual European meetings and conferences

The Inaugural Meeting of the European Centres Group was held in Antwerp on the 23–24 April 2012 at the University of Antwerp, within the Faculty of Medicine and Health Sciences. A total of 16 members from 12 Collaborating and Affiliate Centres and nine countries (Belgium, Denmark, England, Finland, Portugal, Romania, Scotland, Spain and Switzerland) participated.

During the first meeting, the terms of reference were set out and agreements were made to develop the group. Then, a workshop on systematic reviews was held in which several collaborative reviews were set up (illustrated in the table below). The second day of this inaugural meeting included a JBI affiliated student and clinical fellows poster presentation followed by a public symposium entitled ‘Shaping the facts: evidence-based nursing and evidence-based health care’.

About 200 participants attended the presentations of Peter Van Bogart, University of Antwerp; Hans Van Brabant (KCE-Belgium); Walter Sermes, Catholic University of Leuven; Ann Van Hecke, University of Ghent; Alan Pearson, JBI and University of Adelaide; and Susan Weeks, Texas Christian University. The meeting in Antwerp was followed by a Train the Trainer course.

The 2nd European Group meeting was organised and hosted by the Portugal Centre for Evidence Based Practice (POEBP), and took place in Coimbra on 15-16 April 2013. A total of 27 members from ten Collaborating and Affiliate Centres and nine countries (Belgium, Denmark, England, Finland, Portugal, Romania, Scotland, Spain and Switzerland) participated. The meeting allowed face-to-face presentation and discussion of some interesting issues for the European Group. A public symposium held on the second day attracted 130 participants, including health and education representatives, researchers, research fellows and health professionals from Portugal.

Although Professor Alan Pearson, the Executive Director of JBI could not be present, he sent a video communication about implementation science around the globe and new developments in implementation science. This Symposium was an opportunity for the public to be acquainted with JBI’s activities.

The 3rd European Group meeting was held in Bucharest, Romania on 14-15 May 2014, and hosted by the The Romanian Centre for Evidence-Based Nursing and Midwifery (CEBNAM), The Order of General Medical Assistants Midwives and Medical Assistants in Bucharest, Romania. A total of 21 representatives from 11 centres participated in the meetings following the theme of ‘Evidence based nursing in Europe: assessing the status quo and the prospects for collaboration’. Following the meetings the centre ran a nursing conference entitled ‘Implementing challenges and opportunities for evidence-based practice’. This conference was attended by more than 600 nurses and a number of European Directors held keynote speeches and workshops.

Online platform for collaborative work
In order to make the European collaboration work easier, the Spanish Collaborating Centre coordinates the creation and maintenance of an online platform: JBI Europe Team. (Now this platform is undergoing some changes to make it more user-friendly).

Noteworthy projects

European research programs aligned
The European JBC Centres have submitted several European research proposals for promoting evidence-based practice. These are listed below:

**COST Research Network proposals:**
- European Network of Healthcare Research: New innovative models of care delivery and non-pharmacological interventions
  - Coordination partner: Spain
  - Collaboration partners: Portugal, Switzerland, Romania, Finland and France
  - Status: Rejected
- ENViRoon – European Non-pharmacological Intervention and Implementation Research Network
  - Coordination partner: Spain
  - Collaboration partners: Belgium, Portugal, Switzerland, Romania, Chezick Republic, United Kingdom
  - Status: Rejected
- European Non-Pharmacological Interventions Network for promoting healthy and active aging (NP4HA2)
  - Coordination partner: Spain
  - Collaboration partners: Belgium, Portugal, Switzerland, Romania, Czech Republic, United Kingdom
  - Status: Rejected
- European Network of Healthcare Research: New innovative models of care delivery and non-pharmacological interventions
  - Coordination partner: Spain
  - Collaboration partners: Portugal, Switzerland, Romania, Chezick Republic, United Kingdom
  - Status: Rejected
- European Network of Healthcare Research: New innovative models of care delivery and non-pharmacological interventions
  - Coordination partner: Spain
  - Collaboration partners: Portugal, Switzerland, Romania, Chezick Republic, United Kingdom
  - Status: Rejected

**Other projects**

Belgian Interuniversity Collaboration for Evidence-Based Practice (BICEP): an Affiliate Centre of the Joanna Briggs Institute
The Belgian Interuniversity Collaboration for Evidence-Based Practice (BICEP), the Belgian JBI Affiliated Centre, is negotiating intensively with the Belgian Federal Government about financing a project for the translation of JBI-CONNNECT materials into Dutch and French. This project fits in with a nationwide plan to provide up-to-date, evidence-based knowledge to every Belgian health care professional. The centre expects to have a formal agreement about this funding late in 2014. The prospects of the negotiations are looking good.

Danish Centre of Systematic Synthesis in Nursing: an Affiliate Centre of the Joanna Briggs Institute
Prof Preben U Pedersen, Director of the Danish Centre of Systematic Reviews in Nursing, The Centre of Clinical Guidelines – Danish National Clearing House for Denmark, is leading on a nationally funded project on evidence transfer.

The project translated evidence guidelines to a clinical study which has shown the use of mouthwashes pre-cardiac surgery significantly reduces post-operative infections. This will be completed and published soon. Other centres including Nottingham and Madrid indicated their interest of a wider European opportunity of testing this study in further trials.

Activities in 2014
Eighteen people completed their training in CSR. Sasja Jul Håkonsen (Deputy Director) participated in the JBI Methodology Group for Diagnostic Reviews. The purpose of the methodology group was to provide guidance on systematic review of diagnostic test accuracy – the group has developed a chapter for Reviewer’s Manual, discussed the SUMARI redevelopment and written an article for International Journal of Evidence-based Healthcare based on the diagnostic test accuracy chapter. A two-day seminar for PhD students was arranged by the Clinical Research Unit for Nursing Aalborg University Hospital with participation of representatives from School of Nursing Adelaide and Danish Centre for Systematic Reviews.

A pilot test of the fellowship program was conducted. The first protocol to test the appropriateness of the system to implement recommendation from a clinical guideline in a Danish health care has been developed. The test has been supported with funding from the Danish ministry of Health with 586,000 DKK (78,600€).

A meeting in Spain with the Spanish Centre in order to test part of the fellowship program in Spain has been arranged. Two joint systematic reviews – one in collaboration with the centres in Nottingham and Aberdeen and one in collaboration with the centre at West London University – have been submitted.

Finnish Centre for Evidence-Based Health Care: an Affiliate Centre of the Joanna Briggs Institute
The pathway to evidence translation and interpretation – The Nursing Research Foundation (NRF), which hosts the Finnish Centre for Evidence-Based Health Care (an affiliated centre of JBI) in Finland, is leading a national evidence implementation project. The project aims to disseminate evidence-based consistent practices throughout different kinds of healthcare organizations.
It focuses on three main themes: 1) measurement of fidelity reveals gaps in hand hygiene practices, 2) regional collaboration in falls prevention, and 3) pressure ulcer prevention and risk assessment.

All above mentioned themes are essential in healthcare for a variety of reasons, e.g. from the point of cost-effectiveness. Inconsistent practices, for example, if staff do not adhere to evidence-based guidelines, are global challenges. Therefore the results of this project could be utilised by other centres of JBI.

The Spanish Centre for Evidence Based Healthcare: a Collaborating Centre of the Joanna Briggs Institute

Spanish Centre for Evidence-Based Healthcare is leading a national implementation project, involving hospitals and primary healthcare centres to implement nursing/multiprofessional clinical practice guidelines.

Endorsement program review

JBI launched an endorsement program review in early 2013. The Spanish Centre for Evidence-Based Healthcare has been involved in its revision, and has made a revision report.

Cochrane Nursing Care Field

Spain has contributed to CNCF participating in language translation.

JBI Methodology Groups

JBI launched a new program of methodological development in early 2013 focussing on the synthesis of a diverse range of evidence types including methodologies for synthesis of Umbrella Reviews and Methodology for Mixed Method Reviews. This year JBI will be further developing a number of other methodologies including prognosis, diagnosis, text and opinion and scoping reviews. Members of the JBC were invited to participate in these developments and will produce worked examples, a Lippincott Williams & Wilkins book and a chapter in the JBI Reviewers Manual. A number of members from the European Group have already been involved in this work (Nottingham, Aberdeen, Portugal, Czech Republic and Denmark) and further members will participate in the next round of developments.

Plans for the coming year

The 4th European Group meeting will be held in Nottingham, UK. The Centre for Evidence Based Healthcare will be hosting the meeting which will commence with a JBI Train the Trainer’s course, followed by the Directors meeting on 13-14 May 2015. The second day will be dedicated to a symposium on evidence translation. There will also be an opportunity on the first day for PhD students from Europe to network and undertake some joint workshops. The Danish Centre of Systematic Synthesis in Nursing and the Spanish Centre for Evidence Based Healthcare will continue to meet and collaborate on testing the fellowship program in Spain.

Appendices

Appendix 1

European Region – JBI Collaborating Centre Network

Guiding principles

1. The Network

The network includes all JBI centres in the European Region with no differentiation being made between the collaborating or affiliate status.

2. Purpose and Aims

> The purpose of the network is to strengthen the working relationships between European Centres. The aims of the network are to:
> > Develop a coherent and strong regional presence within the JBI Collaboration;
> > Develop peer support and working partnerships among European Centres to support and extend JBI collaborative activity;
> > Pool expertise and resources to pursue appropriate research, synthesis and translation activity including funded projects;
> > Coordinate regional responses to issues raised by JBI/ University of Adelaide/ Committee of Directors.

3. Frequency of meetings

The Network will normally meet face-to-face twice a year, once in Europe (Spring) and once at the Convention/ Colloquium (Autumn) and electronically via SKYPE/ teleconference between face-to-face meetings.

Virtual meetings will be scheduled as required with an expectation that there will be one SKYPE/ teleconference between face-to-face meetings.

4. Spring Meeting and Symposium

The spring meeting will normally include a half-day symposium. The date and host of the spring meeting will be decided at the preceding spring meeting. The host of the spring meeting and symposium will offer a meeting venue at no cost to JBI collaborating centres.

5. Coordination of meetings

Coordination of the meetings will be undertaken on a rotational basis. Two Centre Directors will be nominated at each face-to-face meeting to coordinate and Chair the virtual and face-to-face meetings in the following six months.

6. Business of the meetings

The members of the network will set the agenda for each meeting. The spring meeting will normally provide the opportunity to share experience, identify collaborative opportunities, undertake working group activity and engage with a range of stakeholders and academic colleagues. In addition meetings will provide the opportunity to discuss issues arising from JBI/University of Adelaide and the Committee of Directors meetings/ teleconferences.
JBI's global ESG and EIG network

**Evidence Synthesis Groups**
JBI Evidence Synthesis Groups conduct Systematic Reviews following the JBI approach making a practical contribution to practice and health outcomes.

- Nigeria Joanna Briggs Institute Evidence Synthesis Group, Nigeria
- University of Botswana, Botswana
- Saint Elizabeth Health Care, Canada
- Dementia Collaborative Research Centre - Consumers, Carers & Social Research, QLD Australia
- Royal Perth Hospital, WA Australia
- University of Newcastle Evidence Based Health Care Group, NSW Australia
- Edinburgh Napier University, Aberdeen UK
- The South African Centre for Evidence Based Nursing and Midwifery, South Africa
- The Centre for Reviews on Health Research and Movement Science, Philippines
- University of New Brunswick (UNB) Saint John JBI Evidence Synthesis Group, Canada
- Children’s Medical Centre of Dallas, USA
- Medical University of South Carolina Centre for Evidence-Based Practice and Outcomes Research, USA
- Sidra Centre for Women’s and Pediatric Evidence Based Health Care, Doha Sidra
- BCNU Thailand, Chang Mai Thailand

**Evidence Implementation Groups**
JBI Evidence Implementation Groups are clinicians, quality managers and other personnel who are part of a global network of people and organisations committed to evidenced based practice and clinical practice improvement.

- St John of God Murdoch, WA Australia
- National University Cancer Institute Singapore (NCIS) Nursing Evidence Implementation Group, Singapore
- Aged Care Quality Association, SA Australia
- Southern Tasmania Area Health Service, TAS Australia
- USSF Medical Centre Department of Nursing, San Francisco USA
- Zhongshan Hospital ICU, Shanghai PR China
- SomerCare Rainbow Chimers, VIC Australia
